ARK
MOBILITY

ARKZON

Mobility for the Maker

ARKZON is mobility built for the Maker, someone who carries their own values with them, wherever they go. Beyond the move itself, Makers draw on years of experience to create new opportunities and expand their ground. ARKZON keeps their entire journey safe and connects them to broader possibilities.

ARKZON

A Logotype Built on Stability and Solidity

Tight letter spacing and wide letter proportions give the ARKZON logotype a low, steady center of gravity. Every unnecessary stroke is removed, leaving a form that is clean, yet unmistakably solid. It holds ARKZON's intent : to protect the Maker's workspace and business ground, and to stand as the foundation for their growth.

The Lion Mask, Formed by Three Lights

The ARKZON emblem gives shape to three core values as a flow of light : fit, efficiency, and sustainability. The space that light illuminates marks the Maker's ground, where their own standards and values are protected. Together, these lights form the Lion Mask, a symbol of the Maker's strong resolve to forge their own path.

Built for the Way You Work

E3 moves light and quick, keeping your work flowing. E5 pairs generous cargo capacity with broad versatility, expanding your business ground. The two are not simply different in size. Each is a different design, fitted to a different way of working and a different direction for your business.

A wider world of work.
A design built to expand it.

Compact in size.
Perfect in every task.

E5 Light Truck	**E3** Pickup	**Standard**	
280 km Range per Charge	**300** km Range per Charge	**110** km/h Top Speed	**60** kW Rated Output
1.0 t Payload	**0.7** t Payload	**270** Nm Max Torque	**54.1** kWh Battery Capacity

※ The stated ranges are development targets based on WLTP(E3 : 300 km / E5 : 280 km). The pre-calculated ranges(E3 : 270-293 km / E5 : 258-274 km) are simulation estimates calculated from the WLTC, the test cycle of the WLTP, together with the vehicle specifications and assumed conditions at the development stage. They are not official certification results from actual testing, and may change depending on final vehicle specifications and test and certification results.

1 Semi-bonnet for driver safety
2 Scratch-resistant cladding
3 Generous cargo space
4 Full LED signature headlamps
5 Full LED rear lamps E3
6 Toolbox E5

A Flow of Focus That Continues, Even in Motion

The ARKZON interior is a space designed with the Maker's focus in mind. Every distraction is removed. Every function you need sits exactly where instinct expects it, so the flow of your work carries on naturally, even on the move.

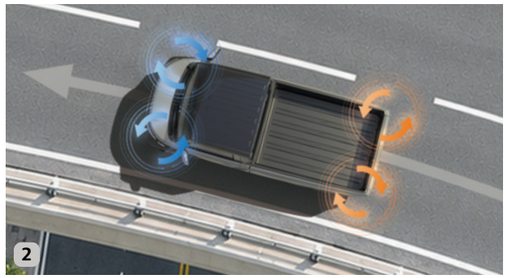

1. Digital instrument cluster
2. Electronic gear selector(EGS, dial-type)
3. Dual wired / wireless phone charging mount
4. Center console / EPB
5. Airbag

Safety is the Foundation of What Lasts

For the Maker, every move is the process that connects today's work to tomorrow's possibility. ARKZON's safety design goes beyond simple protection. It becomes the solid foundation that keeps the Maker's daily life and business going, steady and without interruption.

1 Anti-lock Braking System(ABS)

2 Electronic Brakeforce Distribution(EBD)

3 Electronic Stability Control(ESC)

4 Hill-start Assist Control(HAC)

5 Advanced Emergency Braking System(AEBS)

6 Tire Pressure Monitoring System(TPMS)

※ A semi-bonnet structure is used because it helps secure frontal impact-absorption space ahead of the driver's seat, in line with tightening crash-safety standards for small cargo vehicles.

A Different Solution for Every Move

ARKZON never settles for a single form.
It expands into a wide range of uses, shaped by
the Maker's needs and the conditions of the site.
In every changing moment of work,
the Maker can carry their ground further.

Specifications

E3

E5

Main Specifications

Category		E3	E5
		Pickup	Light Truck
Payload		0.7t	1.0t
Seating Capacity		2 persons	2 persons
Top Speed	km/h	110	110
Charging Time		Fast : 35 min(10 → 80%) Standard : 8 h(10 → 100%)	Fast : 35 min(10 → 80%) Standard : 8 h(10 → 100%)
Battery Type		LFP / NCM(TBD)	LFP / NCM(TBD)
Battery Capacity	kWh	54.1	54.1
Range per Charge	km	300	280
Motor	Rated Output(kW)	60	60
	Peak Output(kW)	115	115
	Rated Torque(Nm)	110	110
	Max Torque(Nm)	270	270
Cargo Bed Size (Inner Dimensions)	mm	1,877(L) X 1,380(W) X 429(H)	2,619(L) X 1,570(W) X 448(H)
Tire Size	Front	195/70R15LT-8PR	195/70R15LT-10PR
	Rear	195/70R15LT-8PR	195/70R15LT-10PR
Curb Weight(CW)	kg	1,450	1,600
Gross Vehicle Weight(GVW) *Based on 2 occupants at 75 kg each	kg	2,300	2,750

Main Equipment / Features

Exterior	Semi-bonnet type / HMSL(LED lamp) / Wide lower cladding / Deck side step / Wide windshield / Cargo bed rust-prevention sealer / Toolbox(E5)
Interior	Digital instrument cluster / Electronic gear selector(EGS, dial-type) / Inner side step / Storage space behind seats / Dual wired/wireless phone charging mount / Dual cup holders
Safety Features	ABS(Anti-lock braking system) / EBD(Electronic brakeforce distribution) / ESC(Electronic stability control) / HAC(Hill-start assist control) / AEBS(Advanced emergency braking system) / TPMS(Tire pressure monitoring system) / Driver airbag / VESS(Virtual engine sound system)
Convenience & Multimedia	EPB(Electronic parking brake) / EPS(Electric power steering) / Rear parking assist system(rear camera, rear parking sensors, reverse warning sound) / MacPherson suspension(front) / Auto lighting system / DRL(Daytime running lights) / Side mirrors(heated, power-folding/adjustable, turn signals) / Heated driver's seat / Power windows / Window power retention / Speed-sensing door locks / Door unlock warning system / Vehicle anti-theft system / Battery preconditioning / Remote key / Bluetooth / Tweeter speakers / AUX

※ The stated ranges are development targets based on WLTP(E3 : 300 km / E5 : 280 km). The pre-calculated ranges(E3 : 270-293 km / E5 : 258-274 km) are simulation estimates calculated from the WLTC, the test cycle of the WLTP, together with the vehicle specifications and assumed conditions at the development stage. They are not official certification results from actual testing, and may change depending on final vehicle specifications and test and certification results.

※ The specifications above are reference information based on development criteria and may differ in part from those of the vehicle at launch.

Hybrid Service

Mobile Service

One free inspection included

On-site inspection service(paid)
Vehicle inspection / diagnosis / replacement service

In-shop Service

Warranty and general maintenance service
Vehicle performance inspection / diagnosis / repair

Nationwide partner service network
General and collision repair parts sales(including consumables)

Warranty Service

2 years / 40,000 km
Body and general parts(consumables excluded)

EV-specific parts
(Warranty period under discussion)

※ Details of the Warranty Service will be announced at the time of vehicle launch.

ARK MOBILITY

Every move begins with a different purpose. Grounded in a deep understanding of every way of working, every purpose, and every individual move, ARK Mobility reduces the barriers around each move and creates new flows.
